

**Cocalico School District**  
**Year-at-a-Glance - Curriculum Overview**

**Department: Business**

**Course: AP Microeconomics**

**Grade Level: 10<sup>th</sup>-12<sup>th</sup>**

**Big Ideas**

- Be fully prepared to take the AP Micro exam if the student chooses to do so.
- Explain how scarcity relates to economics and life in general.
- Graph supply and demand models with the ability to determine prices and price changes.
- Differentiate market structures and correctly graph cost curves.
- Understand the impact of government on personal choices, business decisions, and markets.

**Eagle P.A.C.T. Course Connections:**

Students are presented various economic problems to address from scarcity to supply and demand to production and costs. All require careful analysis. In a course of this level students often work together to enhance knowledge and understanding. As an AP course, the workload can be heavier than that of a general education course requiring students to adapt their time and effort to succeed in the course.
